Dear Mrs. Carrasco,

We are **BS Information Technology students** at the **University of Mindanao**, currently enrolled in IT 12/L Systems Integration & Architecture. As part of our academic project, we are reaching out to SMEs, government agencies, and non-profit organizations to learn more about their existing processes. The insights we gather will help us design IT solutions that are responsive to real-world business and organizational needs.

In line with this, we respectfully request the opportunity to conduct an interview and data-gathering with your organization to better understand your operations and identify potential areas where IT solutions may be of benefit. Specifically, we hope to obtain information on the following:

- A brief history of your company/organization
- Organizational structure and number of employees
- Vision and mission (if available)
- Existing system(s), if any
- Business processes or activities
- (Optional) Estimated gross income, if permissible

All information will be kept strictly confidential and used only for academic purposes. Moreover, your company will be the target beneficiary of our technical output— prototypes, software development plan, or application—subject to the University's existing policies. After the project, we may also request your feedback to help us validate and enhance our proposed IT solution. Should you have any questions regarding our study, please contact *Darius Jay O. Agbon* at *d.agbon.558535@umindanao.edu.ph* or *09630637927*.

Thank you for your kind consideration. We look forward to your positive response and the opportunity to work with your organization.

Sincerely,

**Darius Jay O. Agbon**

**Hyunphil James M. Cueme**
